

Public Meeting

Bleckley County, Houston County, and Peach County

To discuss development of the Watershed Management Plan for Sandy Run Creek and the Ocmulgee River, including opportunities for public participation, and a detailed description of watershed concerns.

June 19, 2017 at 10:00 am

Houston County Commission Annex
200 Carl Vinson Parkway
Warner Robins, GA 31088

Watershed Management Plan

The Middle Georgia Regional Commission is developing a nine element Watershed Management Plan (WMP) for the Sandy Run Creek and the Ocmulgee River primarily located in Bleckley County, Houston County, and Peach County, and we need your help!

The primary goal of the WMP will be improving water quality so that both rivers support their designated uses. Communities can experience numerous economic, environmental, social, and health benefits as a result of this plan. For example, water quality enhancements will provide residents and visitors to the region with additional recreational opportunities (such as fishing) and a better quality of life.

MGRC Needs Your Involvement

All community members are invited to attend the upcoming public meeting with the purpose of briefing the community on the process to be used to develop the Watershed Management Plan for Sandy Run Creek and the Ocmulgee River, public participation opportunities, and to provide a detail description of watershed concerns.

Monday, June 19, 2017 @ 10:00 AM
Houston County Commission Annex
200 Carl Vinson Parkway
Warner Robins, Georgia 31088

MGRC is also seeking participants from a diverse group of local professionals to join an advisory committee to assist with the WMP development. Please contact [Greg Boike](#) or [Jasmine Campbell](#) with any questions or comments on the plan along with advisory committee member suggestions. We hope to see you there!
